## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-22, 34, and 35, drawn to a modem, classified in class 375, subclass 222.
  - II. Claims 23-33, drawn to a microsequencer, classified in class 712, subclass 245.
2. The inventions are distinct, each from the other because of the following reasons:  
Group I refers to processing data in a modem using an air interface processor and also a method/apparatus for extracting data in a modem. Group II refers to a microsequencer programmed to perform multi-way branching instruction based on a set of conditions.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
